- CERN Library
- IST Austria
Patrick Danowski

- Library 2.0
- Open Access
- Creative Commons Licences
- Repositories
- Open Linked Data
- Open Source
IST Austria

- research institute
- basic research
- Campus opened 2009
- Goal: Excellent research in Austria
IST Austria 2010

- Employees: 50 (20 Scientists)
- Books: 0
- eJournals: 500
IST Austria 2014

- Employees: 400 (280 Scientists)
- Books: ~1000
- eJournals: ~5800
Areas of Research

- Chemistry
- Computer Graphics / Vision
- Cryptography
- Evaluation Biology
- Math
- Molecular Biology
- Neuroscience
- Physics
- Plant Science
- Statistics
- Theoretically Computer Science
Good Morning, Special-Librarian Ethan Hunt,
This message will destroy itself in 30 sec

your mission, if you should you choose to accept it:

Build an e-only library
for our researchers
The Team
Mission Report & Obstacles
James: eJournals

- Market well established
- Acceptance rate in Science very high
- No discussions
- All journals subscribed eOnly

Success!

Claudia: Tradition

(CC) Penn State: Behind-the-Scenes 014: https://flic.kr/p/dXEwf2
Claudia: Working processes
Chris: not available
Example

- Basic Text Book in Molecular Biology
- Published by Garland Science
- owned bei Taylor & Francis
- no e-Version available
- Our library hold 5 copies

(C) Garland Science
4. Price models

(C) Photo by Alan Cleaver - http://flic.kr/p/7fP5dL
Models

- Packages
- Evidence Based Acquisition
- Patron Driven Acquisition
- Aggregator
- Pick and Choose
- ...

5. Different usage

romana klee

perhaps you do not need to write all over library books

Weber. He opposed "work ethic" which is thought. To speak of a soteriology, to emphasize two points: it is a system (in a traditional sense) offering final sense that it makes it possible for polytheism of everyday life and its diversity; we (may) think that concern involves both what kind of rationalization the system and image of the world: an increasing means of increasingly precise and wish to add, a master-text which verse and of one's place (usually myth, story or history.

The phrase "polytheism of everyday life and its diversity"
Conclusions

• Scientists still like books
• Print is (sometimes) still needed
• Usage, working process and reading is changing but totally change yet
Conclussion

A hybrid library is needed to fulfill all user needs
Mission aborted... for now...
Please Wait

Restart coming soon
To be continued ...
