

COLLABORATORS

RAE thanks the researchers who put their time, experience, and wisdom at the service of the development of the articles submitted. This is a form of volunteer work fundamental for the improvement of our texts and one that contributes to the Brazilian academy of business administration. From January to December 2019, 291 collaborators participated, whose names are listed on page 76.

We recognize the valuable work of the members of the Scientific Editorial Board and Reviewers, and, as usual, we classify the year's best, whose collaboration was decisive for the quality of the articles published in RAE. Thirty-five researchers were classified based on three criteria: number of evaluations carried out, compliance with the deadlines for responding to the authors, and quality of the evalua-

tion work. Each scientific editor participated in the preliminary evaluation and monitoring of three articles, and each took 11 days, on average, to complete his/her opinion. The evaluators who participated in our blind review process in 2019 carried out 2 evaluations and took 27 days to complete their opinions, on average. Special Thanks!
