

Comentários sobre a Reprodutibilidade das Pesquisas

IV Colóquio de Pesquisa Aplicada

Cesar Zucco

FGV-EBAPE

Algumas Práticas “Emergentes” de Pesquisa

- Revisão ética prévia
- Pré-registro de análise/desenho de pesquisa
- Arquivamento público de dados e material de replicação

Por que publicar os dados?

- Avançar o conhecimento/corriger erros
- Exigência de financiadores
- Exigência de periódicos
- Aumentar impacto dos trabalhos

Os Problemas

- Obter crédito pelo trabalho
- Garantir preservação de longo prazo
- Lidar com arquivamento e distribuição

Uma Solução: Dataverse Project

Open source research data repository software

Researchers

Enjoy full control over your data. Receive *web visibility*, *academic credit*, and *increased citation counts*. A personal dataverse is easy to set up, allows you to display your data on your personal website, can be branded uniquely as your research program, makes your data more discoverable to the research community, and satisfies data management plans. [Want to set up your personal dataverse?](#)

Journals

Seamlessly manage the submission, review, and publication of data associated with published articles. Establish an *unbreakable link* between *articles in your journal* and *associated data*. Participate in the open data movement by using Dataverse as part of your journal data policy or list of repository recommendations. [Want to find out more about journal dataverses?](#)

Institutions

Establish a research data management solution for your community. Federate with a growing list of Dataverse repositories worldwide for increased discoverability of your community's data. Participate in the drive to set norms for sharing, preserving, citing, exploring, and analyzing research data. [Want to install a Dataverse repository?](#)

Developers

Participate in a vibrant and growing community that is helping to drive the norms for sharing, preserving, citing, exploring, and analyzing research data. Contribute code extensions, documentation, testing, and/or standards. *Integrate research analysis, visualization and exploration tools*, or other research and data archival systems with Dataverse. ESCOLA BRASILEIRA
DE ADMINISTRAÇÃO
PÚBLICA E DE
EMPRESAS

A Escola Brasileira de Administração Pública da Fundação Getúlio Vargas (EBAP/FGV) foi criada no dia 15 de abril de 1952, na cidade do Rio de Janeiro, como a primeira escola de administração pública do Brasil e da América Latina. A EBAP surgiu por meio de uma parceria entre a FGV e as Organizações das Nações Unidas (ONU) para atender a demanda por profissionais qualificados na área pública no país. Em 2002, a EBAP passou a se chamar Escola Brasileira de Administração Pública e de Empresas (EBAPE), confirmando também a sua atuação no setor privado, que na verdade, sempre existiu desde sua origem. A Escola conquistou credibilidade, legitimidade e uma capacidade surpreendente de agregar conhecimento de alto nível aos seus estudantes, introduzindo-os em um processo produtivo de excelência.

 **Replication data for: The Power of Partisanship in Brazil: Evidence from Survey Experiments** Version 2.2

Samuels, David; Zucco Jr., Cesar, 2013, "Replication data for: The Power of Partisanship in Brazil: Evidence from Survey Experiments", <https://hdl.handle.net/1902.1/21485>, Harvard Dataverse, V2, UNF:5:GmWJCYxOWCv2QKwqWDkCcA==  Cite Dataset  Learn about Data Citation Standards.

Description

To what extent do party labels influence individuals' policy positions? Much research has examined this question in the US, where party identification can generate both in-group and out-group pressures to conform to a party's position. However, relatively little research has considered the question's comparative generalizability. We explore the impact of party labels on attitudes in Brazil, a relatively new democracy with a fragmented party system. In such an environment, do parties function as in-groups, out-groups -- or neither? We answer this question through two survey experiments, one conducted on a nationally-representative sample and another on a convenience sample recruited via Facebook. We find that both in- and out-group cues shape the opinions of identifiers of Brazil's two main parties, but that cues have no effect on non-partisans. Results suggest that party identification can structure attitudes and behavior even in "party-averse" environments. (2013-05)
